

CHINTHAGUNTI KANTHAMANI

Senior Angular Developer | Frontend Developer

Email: mani.chinthagunti@gmail.com | **Phone:** +91 7093420127 | **LinkedIn:** linkedin.com/in/kanthamanichinthagunti0ba336207

PROFESSIONAL SUMMARY

Highly skilled Frontend Developer with 6.10 years of experience in developing scalable, responsive, and high-performance web applications. Strong expertise in Angular 17+, TypeScript, JavaScript, HTML5, CSS3, SCSS, RxJS, REST APIs, React and modern frontend development practices. Experienced in building enterprise HRMS/HCM applications with dynamic forms, reusable UI components, routing, validations, role-based access, dashboards, and API integrations. Proficient in Agile methodologies, Git, Azure, and AI-assisted development tools such as Cursor AI and GitHub Copilot to improve productivity and code quality. Basic working experience maintaining React applications and Redux-based state management

TECHNICAL SKILLS

Frontend Technologies	Angular (14+, 17+), TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap
React FrameWork	React, Redux tools, State management
Angular Concepts	RxJS, Reactive Forms, Routing, Lazy Loading, API Integration, Reusable Components, Http Interceptors, error handling, Authentication
Tools & Platforms	Git, GitHub, Visual Studio Code, Azure, JIRA, Cursor AI, Claude AI, GitHub Copilot
Methodologies	Agile, Jira, OOPs Concepts
Unit Testing	Jasmine, Karma, Jest
Backend	Basics of Nodejs, ExpressJS
Database	SQL Server

PROFESSIONAL EXPERIENCE

Akrivia Automation Pvt Ltd – Visakhapatnam, India

Software Frontend Developer | May 2019 – Present

- Developed and maintained enterprise-level HCM (Human Capital Management) applications using Angular and TypeScript.
- Built dynamic onboarding and employee management modules with complex reactive forms and custom validations.
- Implemented reusable Angular components and optimized UI performance for better user experience.
- Integrated REST APIs and handled API response management with RxJS and asynchronous programming.
- Developed HR and user role-based access modules with create, edit, view, and delete functionalities.

- Worked on Leave Management, Asset Management, Time & Attendance, and Dashboard modules.
- Implemented routing, lazy loading, error handling, and responsive UI design across multiple modules.
- Integrated Balkan Tree visualization for employee hierarchy and organizational structure.
- Collaborated with backend teams, QA teams, and business analysts in Agile development environments.
- Used Git, Azure, Cursor AI, and GitHub Copilot to improve code quality, productivity, and development efficiency.

PROJECT DETAILS

Project: HCM (Human Capital Management System)

Technologies: Angular, TypeScript, JavaScript, RxJS, HTML5, CSS3, SCSS, REST APIs, GitHub, Azure, JIRA

- Developed employee onboarding workflows with dynamic forms and custom field management.
- Implemented employee profile management with role-based permissions.
- Worked on bulk upload functionality and employee policy management modules.
- Developed reports and dashboards for HR insights and employee analytics.
- Created responsive and user-friendly UI screens for enterprise web applications.
- Issues fixed on react project and debugging easily because of state management
